

IMPORTANT NOTICE.

Be aware that you are now required to turn off all electrical devices that you have on you. By doing so, you will automatically disconnect from your data, bluetooth and wifi.

Your health is our priority, as are the team who work here and our families who live on these premises.

For future appointments, remember to switch off before entering.

If you are a regular client, you will have already been made aware of the health implications of wifi. However, whether you are a regular client or a new client, we are always happy to discuss this and any other health topic with you.

If you do not wish to comply or continue with your appointment, please make us aware so that we can adjust our bookings accordingly.

From The Team at GHC, we thank you.
